Optimize

Identify optimal networks and services through the MiX platform:

- **Networks** – Obtain the optimal network configuration specific to your member population, realize immediate cost savings, and drive new business with high performing network utilization.

- **Medical, Specialty, Narrow, OON, and Ancillary Services** – Single platform to enhance claims processing, necessary services, and add on capabilities to improve your network solution.

- **Repricing, Bill Review, and Direct Contracting Contracts** – Value based arrangements that best fit your growth strategies, network efficiency needs, and client requirements.

- **Employer / Provider Connectivity, COE, and Bundled Arrangements**

Connect

Access your Intelligent Health Market through a single integration point:

- **Easy Integration Process** – Maximize interoperability while minimizing disruption to your business processes.

- **Simple, Flexible Connectivity** – Access your entire healthcare ecosystem through one connection point; when you need to augment or re-optimize your network, no rework is required.

- **Real-Time, Actionable Insights** – Proactive monitoring alerts you to file or processing anomalies to keep your business running smoothly; claims analytics surfaces opportunities for improved savings.

- **Secure, Reliable Infrastructure** – Your data is stored in a HIPAA/SOC2 compliant cloud environment with all infrastructure, services and connections managed and monitored by MacroHealth.

Innovate

Leverage actionable, real-time data insights to gain a competitive edge and grow your business:

- **Foster Membership Growth** – Foster membership growth through innovative network solutions designed for each member population.

- **Identify Additional Savings Opportunities** – Identify additional savings opportunities with prescriptive analytics that sense rising cost trends and provide insight into meaningful claim trends and patterns, enabling you to continually optimize network solutions.

- **Lower Healthcare Costs** – Lower healthcare costs through innovative partnerships between providers and employers to drive care to the most efficient care settings.
